

To the Central Committee
of the Greek Communist Party

Dear comrades

Please receive an internationalist and revolutionary salute for the celebration of your 95th anniversary of struggles for the working class and the Greek people. It is an heroic path that gives dignity to the communists of all the world, considering the great class battles faced by the comrades. In these nine and half decades of struggle the KKE acquired admirable experience that enables you to direct with bravery the fight against the barbarism of the *troika*: EU, IMF and ECB.

Comrades

From Brazil we would like to express our pride to be with the KKE in the trenches of struggle against the reformism, the opportunism, and for the reorganization of the international communist movement based in Marxism-Leninism. At present times, when capitalism faces its biggest crisis and tries to attack the rights and conquests of workers, to be a companion of KKE in the construction of a new society, the socialist society, is a reason of great dignity for the Brazilian communists.

Long life to workers internationalism!
Long life to Marxism-Leninism!

Central Committee of the Brazilian Communist Party – PCB
Rio de Janeiro, 4th of December, 2013
