

COMITATO CENTRALE

To the Central Committee of the Communist Party of Greece

Dear comrades,

Let us warmly greet the Communist Party of Greece, its leaders and militants, on the occasion of the 95th anniversary of KKE foundation.

During almost one century, the Communist Party of Greece has passed through serious historical events: from the exciting years of the Socialist Revolution's victory and the successful construction of Socialism, to the antifascist Resistance, the antimperialist armed struggle of 1946-49, the clandestinity during military dictatorship, the temporary success of counterrevolution and the disappearance of the USSR, up to nowadays, to the dictatorship of monopolistic capitalism and the EU.

The KKE has always been leading the Greek working class and people's masses along the revolutionary path of uncompromising class struggle towards Socialism-Communism and never abandoned this goal, even during the darkest periods of war and dictatorship.

KKE firmness on Marxism-Leninism principles, its coherence, authentically scientific analysis and determination at political acting, its brotherly internationalist commitment, have made KKE not only the reliable vanguard of Greek working class, but an example for truly revolutionary-oriented Communist and Workers Parties.

While the cancer of opportunism and ideological heeling seems to affect a part of the International Communist Movement, the authoritative voice of KKE is a guarantee for all of us that opportunism will not prevail and the revolutionary ideas of Marx, Engels, Lenin and Stalin will finally overcome.

We assure you, dear comrades, that we will be by you in our common, difficult and glorious march towards Socialism-Communism.

Long live the proletarian internationalism!

Long live the Communist Party of Greece!

Rome, December 4 2013
